Bathroom Renovation

About the project

The renovation of bathrooms includes complete renovation of 198 bathrooms and replacement of technical installations at the dormitory.

The decision to renovate the bathrooms at the dormitory was made at a residents' meeting on September 10th 2020. The rationale for the decision is that the bathrooms at the dormitory are outdated and worn together with the technical installations.

Renovation of bathrooms in apartments includes:

- Demolition of existing bathroom.
- Reconstruction of new bathroom.
- Replacement of water, heating ventilation and electrical installation in bathrooms.
- Replacement of supply pipes for water in the building.
- Installation of water meters for individual billing after renovation.

Temporary shower and toilet

It is not possible to use the bathroom in your home during the 5 weeks of renovation. Temporary and separate rooms with toilet and shower will be set up for you to dispose of during the renovation.

You will be the only one with access and be responsible for cleaning and locking the room. Temporary bathroom will be provided by staff.

The key to the bathroom is handed out when renovation in your apartment starts.

Access to your apartment

The craftsmen need access to your apartment during the renovation. In case you can't be home you will have to hand in the key at the service office or in the mailbox at the same place. – PLEASE remember to label the key with your apartment number.

NOTE – You can have an extra key made by contacting the Service office

Storage of the key to your home

The key to your home is stored in a locked box at your front door.

The box can only be opened by the craftsmen who have to do work in the apartment.

Kitchen water

Throughout the construction period, there will be planned shut down of water supply lasting 2 – 4 hours each time. At the same time the water will be shut down during connection of the new pipelines.

These down periods will be notified via SMS, if you are not signed up for it, please see below.

SMS-service

Notification/ info is sent via SMS, e.g. before planned water outage or in case of acute damage.

Sign up for SMS service can be done at Hasseris Boligselskabs website www.hasseris-boligselskab.dk/beboer/til-og-frameld-sms-service/

Information board

Information regarding the renovation is available at the entrance to the stairwell.

There will be project descriptions, illustrations and drawings of the new bathrooms, renovation schedule and contact information.

Noise and dust

During the renovation there will be periods with noise and dust both inside and outside your apartment.

The craftsmen will perform a light cleaning when the work in your apartment is over.

Group rooms

The dormitory's group rooms will be available throughout the construction period for all tenants. If you have questions about group rooms, please contact the staff.
